

ONE OF A KIND

sonor.com/oneofakind

Our limited „One Of A Kind“ drums are the very top of the line of the Sonor snare program and honour the long tradition of exciting veneers and innovative instruments within the company's history.

Each series features an extremely limited run of specially designed snare drums with spectacular natural grown veneers and new shell designs. For each edition a certain tree has been selected with the goal in mind to only use the most exciting parts of the grain and set them to perfectly set vertical grain patterns.

All veneers are sourced at specialized suppliers in Germany, which guarantee that these trees come from environment friendly sources and are exported/ imported legally. The instruments badges highlight laser cut mallet shaped logos, made out of the same veneer that is used on the snares itself.
