The new
Floyd RoseTM
SUSTAINER

The most revolutionary advancement in guitar technology designed exclusively for Kramer Guitars.

S U S T A I N E R

Seven years ago, Floyd Rose introduced the innovative "Original" Floyd Rose™ Tremolo System. It was the first patented double-locking system ever made and it literally set the standard for tremolos.

Now Floyd Rose, with co-inventors Steve Moore and Rick Knotts, has created a device that goes beyond a guitar players' dreams and once again advances guitar technology...The Floyd Rose Sustainer. This new device will enable the player to perform seemingly endless sustain without changing his style of playing. It creates the added dimension for the sustain of a single note or a full chord. Notes can be held virtually as long as the battery lasts!

The Floyd Rose Sustainer is a totally self-contained electronic device which resembles a humbucking pickup. It operates on two nine volt batteries and requires no external connections or gadgets, allowing complete freedom of movement. The Sustainer can be switched on and off at the player's discretion for flexibility in performance. The Sustainer can also operate as a humbucking pickup.

Fundamental Mode where primarily fundamentals of the note or notes being played will be sustained.

Harmonic Mode Relative to the position on the neck, the Sustainer will sustain the second, third, fourth and sixth harmonics and can actually "transform" a basic note into harmonics. This effect can also be triggered manually by the player's technique.

Other features of the Floyd Rose Sustainer include a Sustain Intensity Control which varies the sustain amplitude and a low-battery indicator.
