

Hilite

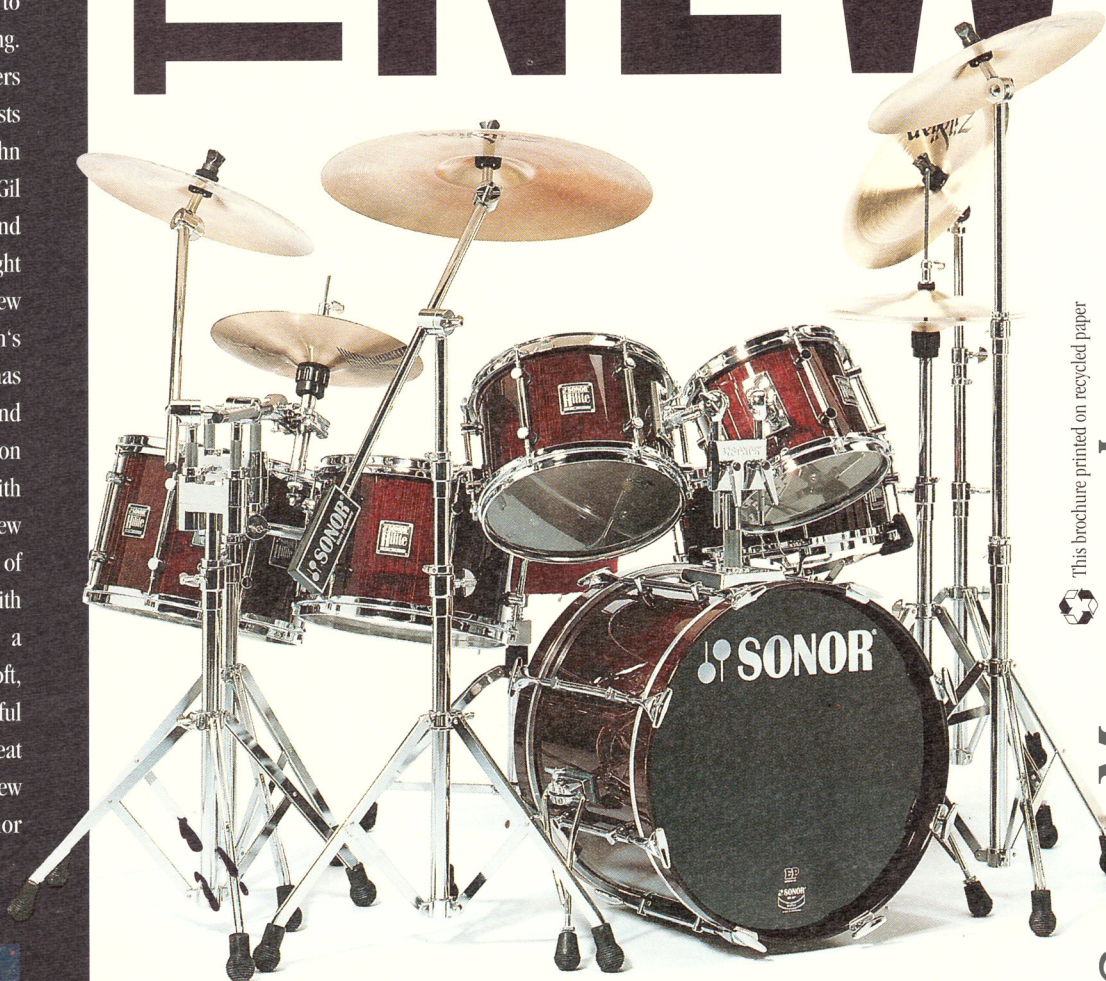

Musical balance is the key word to describe Adam Nussbaum's drumming. He is one of world's most versatile players today. His working credits include artists such as The Brecker Brothers, John Scofield, Mike Stern, Dizzy Gillespie, Gil Evans, Eliane Elias, Sonny Rollins, and many more. Balance is also the right description for the sound of the new Adam Nussbaum Series of drums. Adam's input on the development process has resulted in a unique sounding and looking drum series. It is a combination of Sonor H'lite maple drums with traditional sheen depths in the new attractive walnut finish. The sound of these new drums is brilliant, vibrant, with a wide range of overtones. They offer a broad range of dynamics from a soft, subtle tone to a full-bodied, powerful sound with clear attack and great projection. Check out this exciting new drum line yourself at your local Sonor dealer!
